FURNACES.

THE ATTENTION of the community generally, and of house-builders particularly, is invited to the Keystone Heater, lately patented by J. D. Green, of Philadelphia.

All persons interested are solicited to call at our store and satisfy themselves of the superiority of this heater over all others in use. So successfully have the principles of combustion been applied in its construction, that athough it presents a radiating surface of one hundred and fifty square feet, it requires thirty per cent. less coal than any furnace heretofore manufactured.

Every improvement that an experience of thirty years in the furnace business could suggest has been applied in the production of the Keystone Heater, and its proprietors feel assured that, for efficiency and economy of use, it is unsurpassed.

So ISBLEY & GUY,

No. 320 Penn. avenue, bet. 10th and 11th sta.,
